

In 2018, the Okauchee Lake Management District began working with Arnold Groehler an authorized DNR muskrat removal agent, to control the muskrat population in Okauchee Lake and surrounding shorelines. The goal is not to eradicate all muskrats. There will always be some muskrats present due to the preferred muskrat habitat found in Okauchee Lake. The goal is to reduce the number of muskrats to minimize shoreline damage caused by their digging and burrowing. Trapping will take place primarily in early spring. Some fall trapping may occur on an individual basis.

In order to have muskrats removed from the shoreline on your property, your consent is required. After you submit your consent form, Mr Groehler may contact you via email or phone to discuss the muskrat removal process and control dates.

If you would like muskrats trapped on your property's shoreline, please complete and submit the form below before March 1.

OLMD, P.O.Box 526, Okauchee, WI 53069 OR www.olmd/forms

Your consent remains in effect until you notify us that access to your property is no longer given. Thank you!

I authorize Arnold Groehler, authorized DNR muskrat removal agent, to access the the property listed below for the purpose of muskrat removal and control. **This permission form has no expiration date and remains in effect unless you request to be removed from the OLMD Muskrat Removal Program property list.** Please contact the OLMD by email at info@olmd.org or in writing at our mailing address listed below if you wish to be removed from the OLMD Muskrat Removal Program list, have problems with muskrats on your property, or have any questions or concerns. You may also mail this consent form to:
